

Optimizing weight loss outcomes in bariatric surgery

Citation for published version (APA):

Romeijn, M. M. (2022). *Optimizing weight loss outcomes in bariatric surgery*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20221007mr>

Document status and date:

Published: 01/01/2022

DOI:

[10.26481/dis.20221007mr](https://doi.org/10.26481/dis.20221007mr)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Optimizing weight loss outcomes in bariatric surgery

Marleen Romeijn, 7 oktober 2022

1. Non-respons na bariatrische chirurgie is een onderschat probleem dat eerder herkend en behandeld moet worden. *(dit proefschrift)*
2. Een multidisciplinaire aanpak is het sleutelwoord bij patiënten met non-respons na bariatrische chirurgie. *(dit proefschrift)*
3. Een conservatieve aanpak in plaats van een operatieve aanpak verdient de voorkeur bij patiënten met non-respons. *(dit proefschrift)*
4. Omwille van het gewichtsverlies zou iedere Roux-en-Y gastric bypass een banded Roux-en-Y gastric bypass moeten zijn. *(dit proefschrift)*
5. Non-response after bariatric surgery contributes to the philosophy that obesity is a chronic disease. *(Weber et al, 2018)*
6. Overeating doesn't cause obesity, but obesity causes overeating. *(Lecture of Prof. le Roux, 2022)*
7. We learn more from our (weight loss) failures rather than our successes. *(Lecture of Prof. Higa, 2021)*
8. 'Vroege vogels' hebben een verlaagd risico op het ontwikkelen van obesitas. *(Covassin et al, 2016)*
9. De invoering van de suikertaks is een stap in de goede richting, maar pas het begin.
10. Iedere wijze uil is ooit een uilskuiken geweest.
