

Transvaginal hydrolaparoscopy in the diagnosis of tubal pathology

Citation for published version (APA):

Tros, R. (2022). *Transvaginal hydrolaparoscopy in the diagnosis of tubal pathology*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20221209rt>

Document status and date:

Published: 01/01/2022

DOI:

[10.26481/dis.20221209rt](https://doi.org/10.26481/dis.20221209rt)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Poor patient selection contributes to the failure rate of THL (this thesis)

Failure of THL in experienced hands is mostly related to abnormalities (tubal pathology, endometrioses and/or adhesions) (this thesis)

Conventional laparoscopy should only be carried out for therapeutical reasons when THL has been performed (this thesis)

When starting to perform THL, do so with a small executive team in a self-selected group of patients without retroverted uteri (this thesis)

Performing THL during residency without strict supervision is not feasible; moreover one should advocate to concentrate THL to dedicated gynaecologists (this thesis)

Om het beoogde inclusie-aantal te behalen is meer nodig dan financiering en studie-prioritering (Vrij naar Dreischor, F. et al. Waarom de studie Zin en Zwanger voortijdig werd stopgezet en wat het ons leerde. NTOG mei 2022;135(4): 248-249.)

Je niche kennen en uitbouwen is zinvoller dan proberen beter te worden in datgene waar je kracht niet ligt.

Behoud van benigne gynaecologie in de academie is noodzakelijk om de onderzoekskloof tussen sekse specifieke onderwerpen te dichten.

Luister naar je lichaam en doe geen dingen die ik ook niet zou doen.
