

Parental tobacco use

Citation for published version (APA):

Nabi, E. (2022). *Parental tobacco use: dual use of e-cigarettes and cigarettes, and interventions to help them quit*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20221209en>

Document status and date:

Published: 01/01/2022

DOI:

[10.26481/dis.20221209en](https://doi.org/10.26481/dis.20221209en)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

This thesis:

1. Parents who use both e-cigarettes and cigarettes may have higher rates of contemplating smoking cessation than parents who only smoke cigarettes.
2. Most dual-users continue to smoke or be dual-users after at least one-year follow-up.
3. Implementing a program to treat parents for tobacco use within pediatric offices was associated with markedly higher rates of tobacco treatment delivery and a decline in practice-level parent smoking rate compared to usual-care controls.
4. It could be difficult for parents to access smoking cessation medication due to financial constraints.
5. I think we're very involved in the community and making sure that our population and community is healthy.

General:

6. While some evidence supports the use of e-cigarettes as quit devices, recent research suggests that their efficacy for quitting is likely overstated - Truth Initiative.
7. There is no risk-free level of exposure to secondhand smoke - Surgeon General USA.
8. Smoking is one of the leading causes of statistics - Fletcher Knebel.
9. Smoking Makes You Lose Weight. One lung at a time!
10. Mom, why don't you tell that girl to not smoke. Does she not know that smoking will make her lungs black? – my seven year old.
