Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Modulation of fat oxidation: nutritional and pharmacological approach

1 The attenuated inhibition of postprandial fat oxidation after ingestion of isomaltulose, a structurally manipulated carbohydrate, in combination with a mixed meal could be attributed to greater supply of FFA to the fat-oxidizing tissue (*this thesis*).

2 Short-term supplementation of the catechin EGCG induced a shift towards a more oxidative phenotype, but research is required under what conditions EGCG will have the optimal effect (*this thesis*).

3 The increased fat oxidation after the GLP1 receptor agonist liraglutide is independent of weight loss, energy balance and physical activity, which may indicate that liraglutide has a direct effect on fat oxidation (*this thesis*).

4 Dietary supplements or pharmacological intervention may be a useful tool to increase the lifestyle intervention success (*this thesis*).

5 Science never solves a problem without creating ten more (George Bernard Shaw).

6 What we know is a drop of water, what we do not know is the ocean. (Isaac Newton, 1642-1727)

7 When we know what we are doing, it wouldn't be called research (Albert Einstein).

8 Als je het belang van je onderzoek niet aan je moeder kan uitleggen, is er waarschijnlijk niets mis met je moeder, wel met je onderzoek (Maarten Boksem).

9 Nothing great is easy (Captain Matthew Webb).
