

The novel application of high resolution peripheral quantitative ct imaging in distal radius and scaphoid fractures

Citation for published version (APA):

Daniels, A. M. (2023). *The novel application of high resolution peripheral quantitative ct imaging in distal radius and scaphoid fractures*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20230630ad>

Document status and date:

Published: 01/01/2023

DOI:

[10.26481/dis.20230630ad](https://doi.org/10.26481/dis.20230630ad)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

The novel application of High Resolution peripheral Quantitative CT imaging in distal radius and scaphoid fractures

1. Bone microarchitecture or strength is not associated with pattern complexity of distal radius fractures (*this thesis*)
2. Deteriorated cortical bone quality is associated with an increased risk of secondary distal radius fracture displacement (*this thesis*)
3. More than one-third of scaphoid fractures diagnosed with HR-pQCT is missed by the current application of conventional CT scanning (*this thesis*)
4. Additional high resolution CT imaging in suspected scaphoid fractures should not be conducted in addition to or based upon clinical reassessment but should immediately replace the current clinical reassessment (*this thesis*)
5. By introducing early additional (high resolution CT) imaging time to definite diagnosis of scaphoid fractures will be shortened and decisions on treatment can be made more reliable (*this thesis*)
6. A correct diagnosis is three-fourths the remedy - *Mahatma Ghandi*
7. It is easier to build strong children than to repair broken men - *Frederik Douglass*
8. If it makes you nervous, you´re doing it right - *Donald Glover*
9. Let´s discuss, you might change my truth - *Loesje*
