

# Blood, bones and brains : peripheral biological endophenotypes and their structural cerebral correlates in psychotic disorder

Citation for published version (APA):

van der Leeuw, C. (2015). *Blood, bones and brains : peripheral biological endophenotypes and their structural cerebral correlates in psychotic disorder*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20150623cl>

## Document status and date:

Published: 01/01/2015

## DOI:

[10.26481/dis.20150623cl](https://doi.org/10.26481/dis.20150623cl)

## Document Version:

Publisher's PDF, also known as Version of record

## Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

providing details and we will investigate your claim.

## **BLOOD, BONES AND BRAINS**

### Peripheral biological endophenotypes and their structural cerebral correlates in psychotic disorder

1. Er is toenemend bewijs voor de oestrogeenhypothese van schizofrenie. (dit proefschrift)
2. De gevolgen van antipsychotica-geïnduceerde hyperprolactinemie worden onvoldoende (h)erkend in de klinische praktijk. (dit proefschrift)
3. S100B is geen bruikbare biomarker voor psychotische stoornissen. (dit proefschrift)
4. Perifere markers dienen te worden geassocieerd met structurele breinmaten. (dit proefschrift)
5. Psychose is en blijft een klinische diagnose, ook als de etiologie is opgehelderd.
6. Endofenotypen bieden meer inzicht in ziekteprocessen wanneer zij verklaard kunnen worden vanuit het mediatiemodel.
7. Psychiatry is the final frontier in medicine.
8. The publication of negative findings will ultimately benefit patients, the file drawer effect will not. (valorization)
9. In so far as a scientific statement speaks about reality, it must be falsifiable; and in so far as it is not falsifiable, it does not speak about reality. (Karl Popper)
10. The slenderest knowledge that may be obtained of the highest things is more desirable than the most certain knowledge obtained of lesser things. (Saint Thomas Aquinas)
11. Let it be. (The Beatles)
