Thielmann, R. R. L. C. (2023). *Understanding patient perspectives: online access to medical records*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20231205rt>

Document status and date:

Published: 01/01/2023

DOI:

[10.26481/dis.20231205rt](https://doi.org/10.26481/dis.20231205rt)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Understanding Patient Perspectives

Online Access to Medical Records

Rosa Ricarda Leni Charlotte Thielmann

1. Online access will not substantially reduce financial pressures on the health care system. | this dissertation
2. Introducing online access poses the risk of disadvantaging patients with lower health literacy and digital skills. | this dissertation
3. Healthcare providers must document information in medical records in a way that patients can understand. | this dissertation
4. To make an informed decision about whether to use online access, patients need information on how it can impact their participation in healthcare and the patient-provider relationship. | this dissertation
5. Future efforts to support the implementation of online access should highlight privacy safeguards, ensure accessibility of records, and enhance comprehensibility of medical information.
6. Non-digital options should be offered as equal alternatives to digital care innovations for all aspects of patients' healthcare management.
7. The benefits of conducting a needs assessment of the priority population before implementing a health promotion intervention outweigh the costs.
8. We need comprehensive theories to generate synergistic interaction between informed decision-making principles and health promotion strategies.
9. Prediction is very difficult, especially about the future. | Niels Bohr
