3. Involving and supporting patients and their informal caregivers is essential for optimal care transitions. (Dissertation)
4. Long-term care infrastructure has an immense impact on care transitions of older adults. (Dissertation)
5. Assessing functioning of the system is an essential step in promoting accountability, identifying strengths, weaknesses and gaps, and ultimately improving the performance. (Dissertation)

7. Information technology and artificial intelligence could revolutionize transitional care.

Without a concrete idea of what he is living for, man would refuse to live, would rather exterminate himself than remain on this earth, even if bread were scattered all around him." (Fyodor Dostoevsky)
