Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Biosensors, customization and prototyping: how to make point of care diagnostics more relevant

Renato Rogosic, 4th of April 2023

1. Mass production keeps the world divided between consumer and producer. Demassification of production may hasten the speed towards an era of prosumers.

- Michael Petch

2. Point of care devices, have and will continue to have a crucial role in the evolution of personalized medicine.
3. If you can imagine it, you can design it. If you can slice it, you can print it.
4. Don't use a sledgehammer to crack a nut.
5. Technology will play a critical role in finding solutions to many of the challenges our world faces today.
6. Investing in education gives the highest return. Unfortunately, it is a long-term investment.
7. Evaluating the efficacy of a new educational method, is at least as complicated as creating one.
8. 3D printing will complement traditional production methods, increasing flexibility and productivity.
