[10.26481/dis.20211116jg](https://doi.org/10.26481/dis.20211116jg)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Propositions (Stellingen)

Propositions accompanying the thesis

Velocity Optimisation on Waterways

by Julian Golak

1. "While I have some doubts regarding the practical applicability of the proposed scheme, the proposed mechanism offers an interesting direction for further exploration." (Chapter 2)

- Anonymous Reviewer, 2018

2. Everybody is happy, nobody lies. (Chapter 2)
3. For practical purposes, it would be very useful to have an algorithm that, in reasonable time, computes a good sequence of actions for the immediate future. (Chapter 3)
4. Working with real AIS data has its limitations. (Chapter 4)
5. "One of the most significant advantages of this paper is that introduced methodology is explained by appropriate examples." (Chapter 4)

- Anonymous Reviewer, 2021

6. The tools in this thesis create intuitive guidelines for practitioners based on information provision to select an appropriate decision
7. Before you do something sophisticated and complex, try to do something simple.
8. People do mathematics for two reasons only: entertainment and showing off.
