EXPECTED LABOUR DEMAND UNTIL 2026 IS LOWER THAN BEFORE

Although the recovery of employment following the Covid-19-pandemic is proceeding rapidly this and next year, the outlook for the next 6 years is less favourable than projected before the pandemic.

MAJOR BOTTLENECKS FOR EMPLOYERS IN EDUCATIONAL, SCIENCE AND ENGINEERING, ICT AND HEALTHCARE OCCUPATIONS

The forecasts are subject to increased uncertainty because the short and long-term effects of the Covid-19-pandemic on the demand and supply side of the labour market are still unclear. This concerns the effects on economic growth but also on long-term trends such as automation, skills upgrading and increased flexibility of jobs.
