

Collective decision making in economic environments : deterministic and probabilistic approaches

Citation for published version (APA):

Ehlers, L. H. (2001). *Collective decision making in economic environments : deterministic and probabilistic approaches*. Universiteit Maastricht.

Document status and date:

Published: 01/01/2001

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

STELLINGEN BEHORENDE BIJ HET PROEFSCHRIFT

Collective Decision Making in Economic Environments: Deterministic and Probabilistic Approaches

van

Lars Hermann EHLERS

1. The reputation of the university you receive your Ph.D. from is more important than your publication list.
2. It is easy to learn French (at least I should believe in this statement).
3. People are more and more influenced by the media. Many stop thinking independently.
4. Investing in NASDAQ stocks became going on a roller-coaster during the past three years (also due to 3.).
5. It is very easy to get stuck in the Tribunal (an old pub with a nice atmosphere in Maastricht).
6. Maastricht University is closed most of the time.
7. It is a dominant strategy to be nice to all people in the scientific world. You never know who is refereeing your papers.
8. Being a Ph.D. student is a full-time job, with only an occasional exception (which is 5.).
9. Every Ph.D.-student should spend at least one half year abroad.
