Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Galvanic-induced Body Sway

Maastricht, 17 september 2004

S.G.T. Balter

1. Galvanic-induced body sway arises from stimulation of the inferior and superior vestibular nerve and more centrally located vestibular structures (E.g. vestibular nuclei); no substantial excitation of the labyrinthine structures occur.
(dit proefschrift)
2. Galvanic-induced body sway shows a low-pass frequency characteristic very similar to that of galvanic-induced ocular torsion.
(dit proefschrift)
3. Subjects sensitive to carsickness show a similar habituation to a non-motion sickness-inducing galvanic stimulus as healthy subjects.
(dit proefschrift)
4. The sensitivity to galvanic vestibular stimulation of professional gymnasts and untrained girls is not significantly different.
(dit proefschrift).
5. De werkelijkheid, evenals ons geheugen daarvan, is een subjectieve selectie van prikkels.
6. Een oorafdruk kan je de kop kosten.
7. Het eerste anatomieboek dat hurken, lurven en kladden beschrijft moet nog geschreven worden.
8. Vestibulologen duiden duidelijke duizelingen.

9. Zonder tegenwind is er nog nooit een vlieger opgegaan.
10. Wie ergens voor is, staat daar in de regel achter.
11. Een bouwwerk is pas compleet als de laatste stelling is afgebroken.
