

Microvascular actions of insulin : studies on the interaction with angiotensin II and on the postprandial state

Citation for published version (APA):

Jonk, A. M. (2011). *Microvascular actions of insulin : studies on the interaction with angiotensin II and on the postprandial state*. Maastricht University. <https://doi.org/10.26481/dis.20111215aj>

Document status and date:

Published: 01/01/2011

DOI:

[10.26481/dis.20111215aj](https://doi.org/10.26481/dis.20111215aj)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

MICROVASCULAR ACTIONS OF INSULIN

STUDIES ON THE INTERACTION WITH ANGIOTENSIN II AND ON THE POSTPRANDIAL STATE

1. Angiotensine II remt de insulineafhankelijke capillaire rekrutering (dit proefschrift).
2. Kortetermijnbehandeling van hypertensieve patiënten met een angiotensine II receptorblokker geeft geen stijging in insulinegevoeligheid (dit proefschrift).
3. Microvasculaire en metabole effecten van insuline zijn niet onder alle omstandigheden direct aan elkaar gerelateerd (dit proefschrift).
4. In slanke personen leidt de inname van een maaltijd tot een toename in microvasculaire vasomotie. In obese personen blijft deze toename uit (dit proefschrift).
5. Het schrijven van een proefschrift is een risicofactor voor het metabool syndroom (Adam, Stress, eating and the reward system. *Physiol Behav* 2007; 91(4):449-58).
6. Een gemotiveerde patiënt is in staat om te bewijzen dat het metabool syndroom reversibel kan zijn.
7. Fit is not fat!
8. The voyage of discovery is not in seeking new landscapes but in having new eyes (Marcel Proust).
9. When you do not encounter a headwind, you are cycling too slowly (Road racing cyclists's philosophy).
10. Promoveren is net als wonen in Maastricht, je moet het voortdurend aan iedereen uitleggen.

Amy Jonk, 15 december 2011
