

Assessment of variety, clustering and adequacy of eating patterns : Dutch national food consumption survey

Citation for published version (APA):

Hulshof, K. F. A. M. (1993). *Assessment of variety, clustering and adequacy of eating patterns : Dutch national food consumption survey*. [Doctoral Thesis, Maastricht University]. Rijksuniversiteit Limburg. <https://doi.org/10.26481/dis.19930513kh>

Document status and date:

Published: 01/01/1993

DOI:

[10.26481/dis.19930513kh](https://doi.org/10.26481/dis.19930513kh)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Stellingen, behorend bij het proefschrift 'Assessment of variety, clustering and adequacy of eating patterns: Dutch National Food Consumption Survey'

1. De consumptie van alcohol versluiert de interpretatie en evaluatie van voedselconsumptiegegevens.
(dit proefschrift)
2. Voor het ontrafelen van voedingspatronen is clusteranalyse een veelbelovende techniek. Het karakteriseren van de gevonden clusters vereist echter meer specifieke instrumenten dan de thans beschikbare.
(dit proefschrift)
3. In Nederland is een voeding waarin maximaal 10% van de energie-innemings afkomstig is uit verzadigd vet in de praktijk vooralsnog niet haalbaar.
(dit proefschrift)
4. Whatever was the father of a disease, an ill diet was the mother.
George Herbert 1660
5. Maat houden is niet alleen voor a-musicale mensen moeilijk.
6. There is a current trend toward the view that a single food is either a panacea or a poison. This "good food/bad food" dichotomy ignores the wide consensus among nutritionists that all foods can be compatible with health when used in moderation as part of a balanced, varied diet.
E.M. Whelan & F.J. Stare. J Am Med Assoc 1990;263:2661-2663
7. Schattingen van de voedselconsumptie worden bemoeilijkt door het onderschatten van de noodzaak van deskundigheid, tijd en middelen die hiervoor nodig is, en het overschatten van de mate waarin een respondent in staat is om spontaan zijn consumptie nauwkeurig weer te geven.
8. De inspanning tot luisteren bij slechthorenden staat in schril contrast met de aandacht voor slechthorenden in de huidige maatschappij.
9. Nirgends sind die Volksstämme konservativer als wo es Mund und Magen gilt.
Wilhelm Heinz Riehl, 1857
10. Indien de toenemende vervetting van het riool te maken heeft met bereidingswijze van voedsel dan kunnen met behulp van rioolonderzoek risicogroepen worden getraceerd.
