

Energy metabolism, fat mass regulation and predisposition to obesity

Citation for published version (APA):

Joosen, A. M. C. P. (2005). *Energy metabolism, fat mass regulation and predisposition to obesity*. [Doctoral Thesis, Maastricht University]. Datawyse / Universitaire Pers Maastricht. <https://doi.org/10.26481/dis.20051214aj>

Document status and date:

Published: 01/01/2005

DOI:

[10.26481/dis.20051214aj](https://doi.org/10.26481/dis.20051214aj)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

STELLINGEN

behorende bij het proefschrift

Energy metabolism, fat mass regulation and predisposition to obesity

1. Gewichtstoename bij overvoeding is niet gerelateerd aan adaptieve thermogenese.
(dit proefschrift)
2. Vetmassatoename is een functie van de genexpressie.
(dit proefschrift)
3. De mate waarin mensen hun energiebalans kunnen handhaven wordt mede bepaald door hun genotype.
(dit proefschrift)
4. Bij een goede studie-opzet is geen resultaat ook resultaat.
5. Familiale invloed wordt vaak ten onrechte aangezien voor genetische aanleg.
6. In de huidige samenleving is het interessanter te weten waarom de een op gewicht blijft dan waarom de ander dik wordt.
7. There's more to life than the second law of thermodynamics.
(Doyle Farmer, J. Nature 2005;436:627-628).
8. Exercise is bunk.
(Henry Ford)
9. Every person is unique; just like everybody else.
(Despair, Inc.)
