[10.26481/dis.20231013sk](https://doi.org/10.26481/dis.20231013sk)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Patient-centred Haemorrhoidal Disease Management

Sara Z. Kuiper

Alterations in anal collagen could contribute to the formation of haemorrhoidal disease
- *dit proefschrift* -

The sutured haemorrhoidopexy is a safe and efficacious treatment for patients having haemorrhoidal disease and can be proposed as a less-invasive surgical treatment when basic and outpatient treatment options are deemed ineffective
- *dit proefschrift* -

The patient-reported outcome measure-haemorrhoidal impact and satisfaction score (PROM-HISS) is the first haemorrhoidal disease specific PROM following recommended guidelines
- *dit proefschrift* -

The PROM-HISS is a valid, reliable and responsive tool to assess symptoms of haemorrhoidal disease, impact on daily life and satisfaction with treatment in patients with haemorrhoidal disease
- *dit proefschrift* -

Traditional clinical outcomes may not include all relevant benefits and harms as experienced by patients
- *Van Tol et al. J Coloproct 2019* -

A patient-reported outcome measure (PROM) captures a deeper understanding of the disease-burden by obtaining information directly from the patient about their experiences with the illness without interpretation by the healthcare professional or others
- *Black. BMJ 2013* -

Strong patient preferences are a serious threat to the feasibility and success of randomized clinical trials
- *dit proefschrift* -

Most people do not spend a lot of time thinking about their anus, but when it goes wrong the anus can cause a disproportionate degree of pain and distress
- *Mark Cheetham in Schein's Common Sense Emergency Abdominal Surgery* -

Zonder dwarsliggers geen spoor
- *Johan Sliggers* -

Als we willen dat alles blijft zoals het is, moet alles anders worden
- *De Tijgerkat – Tomasi di Lampedusa* -
