

Economic evaluation of prevention programs for cardiovascular diseases

Citation for published version (APA):

Ronckers, E. T. (2007). *Economic evaluation of prevention programs for cardiovascular diseases*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20070111er>

Document status and date:

Published: 01/01/2007

DOI:

[10.26481/dis.20070111er](https://doi.org/10.26481/dis.20070111er)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Behorende bij het proefschrift

Economic evaluation of prevention programs for cardiovascular diseases

Sandy Ronckers, 11 januari 2006

- 1 Traditionele systematische reviews bij economische evaluaties van public health interventies hebben een geringe waarde voor besluitvorming.
(dit proefschrift)
- 2 Vanuit het oogpunt van maximalisering van de kosten-baten verhouding is het niet aan te bevelen om community programma's te focussen op personen met een lage sociaal-economische status.
(dit proefschrift)
- 3 Indien men een community programma wil gaan uitvoeren, moet men zich niet laten ontmoedigen door de hoge maatschappelijke kosten die ermee gemoeid gaan.
(dit proefschrift)
- 4 In de bestrijding van hart- en vaatziekten met behulp van gezondheidsvoorlichting lijkt primaire preventie kosteneffectiever dan secundaire en tertiaire preventie.
(dit proefschrift)
- 5 Bij de evaluatie van complexe gezondheidsinterventies worden de kosten stelselmatig onderschat en de baten overschat.
- 6 "The best is the enemy of good"
(Kreuter, 11th National Health Promotion Annual Conference, Perth, 1999, about the unrealistic demands of evidence in public health policy)
- 7 Kennis is een van de weinige dingen die je vermenigvuldigt door haar te delen.
- 8 Zonder tegenwind is er nog nooit een vlieger opgegaan.
