Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Propositions accompanying the doctoral dissertation

**The Best of Both Worlds?
Studies on Healthy Indulgences and Their Effects on Food Intake
Control**

Nina Belei

1. Not all health claims are created equal. (this dissertation, chapter 1, 2, 3 and 4)
2. Healthy indulgences can be a blessing or a curse, depending on whether health claims feature functional or hedonic food attributes, and on whether one takes on the perspective of food manufacturers or public policy makers. (this dissertation, chapter 2 and 3).
3. Functional rather than hedonic health claims attached to indulgences help consumers to control their food intake. (this dissertation, chapter 2 and 3).
4. The presence of goal-conflict inducing indulgences in a given food product category reduces consumption of regular category members not claiming to be healthy. (this dissertation, chapter 3)
5. People's behavior makes sense if you think about it in terms of their goals, needs, and motives. (Thomas Mann)
6. Studying consumer behavior is a 24/7 profession, as one cannot go home switching off being a consumer oneself.
7. Much more is learned from unexpected findings than from results that are subject to common sense.
8. Writing a doctoral dissertation implies controlling one's urge to reinvent the wheel.
9. The skill of writing is to create a context in which other people can think. (Edwin Schlossberg)
10. Becoming a successful researcher requires the heart and soul of a Labrador and the willpower of a Pitbull.
