

Incentives and behavior in markets

Citation for published version (APA):

Wolk, K. L. (2012). *Incentives and behavior in markets*. Maastricht University.

Document status and date:

Published: 01/01/2012

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Incentives and Behavior in Markets

by
Leonard Wolk

1. As charities age, they become less cost-effective in fundraising (Chapter 2).
2. Giving charities the freedom to spend their funds as they wish to, decreases their fundraising cost-effectiveness contemporaneously (Chapter 2).
3. Novice bidders in internet auctions do not realize the value of waiting to bid (Chapter 3).
4. Monetary incentives are not redundant in prediction markets (Chapter 5).
5. Prediction markets do not only predict future outcomes, but can, under certain circumstances, affect them as well.
6. Non-profit enterprises are similar to firms and need to be audited more carefully.
7. When working with field data we rarely observe the right variables and when we do, we often try to explain unobserved ones.
8. Reality is a social construction.
