Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Labour market forecasts up to 2028

Lower projected economic growth leads to decline in employment growth through 2028

The projected economic growth is lower than before due to declining exports of goods and lower consumption. This lower level of growth leads to a stagnation in employment growth. The labour market inflow of bachelor graduates is high compared to mbo graduates, leading to

relatively good prospects for graduates of mbo4. Higher price levels, existing labour market tightness and (geo)political developments will continue to cause uncertainty on the labour market in the coming years.

Occupations with largest bottlenecks

<ul style="list-style-type: none"> Nursery teachers / Educational assistants General managers / Managers of production and specialized services Public administration, security and legal professions / Government civil servants and administrators / Legal professionals 	<ul style="list-style-type: none"> Engineers and researchers in mathematical, natural and technical sciences / Physics and engineering specialists / Metal workers, machinery mechanics / Electricians and electronics mechanics Horticulturists, arable and livestock farmers Healthcare specialists

** ROA (2023). De arbeidsmarkt naar opleiding en beroep tot 2028. ROA-R-2023/3

2.2 mln Job openings until 2028

From 2023 to 2028, more than 2.2 million job openings are expected. In 91.5% of the cases, this involves replacing workers who leave the labour market temporarily or permanently. The remaining job demand is caused by economic growth.

1.55 mln Graduate inflow until 2028

0.9 mln Students available for side jobs until 2028

Demand and inflow by education level
