

Targeting CAIX with small molecules

Citation for published version (APA):

Parvathaneni, N. K. (2017). *Targeting CAIX with small molecules: design, synthesis and biological efficacy*. Datawyse / Universitaire Pers Maastricht. <https://doi.org/10.26481/dis.20171212nkp>

Document status and date:

Published: 01/01/2017

DOI:

[10.26481/dis.20171212nkp](https://doi.org/10.26481/dis.20171212nkp)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Propositions

Targeting CAIX with small molecules: Design, Synthesis and Biological efficacy

Nanda Kumar Parvathaneni

1. Structure-Activity Relationship (SAR) studies on nitroimidazoles might help to develop ideal radiosensitizers – This thesis
2. Dual Target compounds incorporating a nitroimidazole and a CAIX inhibitor moiety increase the efficacy of standard treatment modalities – This thesis
3. Combining potentially cytotoxic drugs with CAIX inhibitors may improve treatment outcome – This thesis
4. SAR studies on the effect of linker and substitution on CAIX inhibitors might help to increase the specific and selective inhibition – This thesis
5. Personalized medicine is changing the way we fight cancer forever – Doug Hilton
6. Greater understanding of cancer biology has made targeted drugs possible – Martin Drysdale
7. Chemistry past was making simplish molecules, chemistry present is complex molecules, chemistry future is systems of molecules – Lee Cronin
8. Bio-reducible drugs with cytotoxic warheads targeting CAIX would help drug delivery at tumor site with minimal side effects – Valorization addendum
9. A fact acquires its true and full value only through the idea which is developed from it – Justus von Liebig
10. If you are not willing to risk the unusual, you will have to settle for the ordinary – Jim Rohn
11. The great end of the life is not knowledge but action – Francis Bacon
