

Body perception in social environments

Citation for published version (APA):

Lu, J. (2025). *Body perception in social environments: the neural basis of body expression perception in social threat, social interaction and self-identity*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20250129j>

Document status and date:

Published: 29/01/2025

DOI:

[10.26481/dis.20250129j](https://doi.org/10.26481/dis.20250129j)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Propositions

- Social threat can be rapidly detected in the early stages of cortical stimulus processing.
- Whole-body emotion expressions are processed in the brain in a flexible manner depending on the dynamic social context.
- The perception of self-identity occurs rapidly.
- The presence of facial identity alone is insufficient for triggering self-perception regardless of body self-identity.
- A combination of virtual reality and electroencephalography allows us to investigate social interaction situations in a naturalistic fashion.
- EEG markers can be used in clinical diagnosis.
- The brain and body are not separate. What affects one, affects the other.
- The way we think about things determines the way we feel and act.
- 以铜为镜，可以正衣冠；以古为镜，可以知兴替；以人为镜，可以明得失。 By using bronze as a mirror, one can straighten their attire; by using history as a mirror, one can understand the rise and fall of nations; by using people as a mirror, one can discern right from wrong. - Emperor Taizong of Tang, Li Shimin
- 知之者不如好之者，好之者不如乐之者。 Those who know it are not as good as those who love it; those who love it are not as good as those who take joy in it. – Confucius, the Analects
