

The invisible body

Citation for published version (APA):

Zhan, M. (2018). *The invisible body: the neural mechanisms of non-conscious and conscious processing of emotional bodies*. [Doctoral Thesis, Maastricht University]. Ipskamp Printing BV. <https://doi.org/10.26481/dis.20180516mz>

Document status and date:

Published: 01/01/2018

DOI:

[10.26481/dis.20180516mz](https://doi.org/10.26481/dis.20180516mz)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Propositions

- The perception of both human bodies and emotion involves distributed brain areas.
- The phenomenon of visual awareness is multifaceted, involving a variety of brain areas, and mechanisms at different processing levels.
- The dorsal pathway areas are less associated with visual awareness, comparing to the ventral pathway areas under CFS.
- The mechanism of CFS may relate to the rhythmic attentional sampling mechanism, operating at theta frequencies.
- Each methodological tool has its limitations (including CFS, 3T and 7T fMRI, univariate and multivariate analyses).
- Know your data.
- It is a capital mistake to theorize before one has data. Insensibly one begins to twist facts to suit theories, instead of theories to suit facts. – Arthur Conan Doyle (1892). A Scandal in Bohemia, in *The Adventures of Sherlock Holmes*.
- The general public should be updated with the most recent research of consciousness (and brain science in general).
- The devil is in the detail. – Proverb.
- 三思而后行. Think thrice before you act. – Confucius, *Analects*.
- 工欲善其事，必先利其器. The mechanic who wishes to do his work well, must first sharpen his tools. – Confucius, *Analects*.
