

# Clinical and molecular genetic studies in hereditary syndromes featuring skin appendage tumors

## Citation for published version (APA):

Parren, L. J. M. T. (2018). *Clinical and molecular genetic studies in hereditary syndromes featuring skin appendage tumors*. Datawyse / Universitaire Pers Maastricht. <https://doi.org/10.26481/dis.20181204lp>

## Document status and date:

Published: 01/01/2018

## DOI:

[10.26481/dis.20181204lp](https://doi.org/10.26481/dis.20181204lp)

## Document Version:

Publisher's PDF, also known as Version of record

## Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

providing details and we will investigate your claim.

## Stellingen

### **Clinical and molecular genetic studies in hereditary syndromes featuring skin appendage tumors**

1. Tot op heden onbekende (epi)genetische factoren hebben invloed op het phenotype in Brooke-Spiegler syndroom. (dit proefschrift)
2. Patiënten met Brooke-Spiegler syndroom hebben recht op een multidisciplinaire behandeling en er moet tijdens de behandeling aandacht besteed worden aan de psychologische impact van de ziekte. (dit proefschrift)
3. Patiënten met Bazex-Dupré-Christol syndroom moeten vanaf de vroege jeugd gescreend worden op het ontstaan van basaalcelcarcinomen. (dit proefschrift)
4. Immunohistochemisch onderzoek kan bijdragen aan de histologische differentiatie tussen trichoepithelomen en basaalcelcarcinomen. (dit proefschrift)
5. Bij het ontstaan van basaalcelcarcinomen op jonge leeftijd dient gedacht te worden aan een onderliggende genetische oorzaak. (dit proefschrift)
6. Vooral nog is meer onderzoek nodig om in onze familie met Bazex-Dupré-Christol syndroom het onderliggende genetische defect te vinden en om op die manier de ziekte beter te begrijpen. (dit proefschrift)
7. Elke observatie is belangrijk. (*Gerhard Domagk*)
8. De huid is een oppervlakkig orgaan, maar behoeft soms diepgaand onderzoek.
9. If I could offer you only one tip for the future, sunscreen would be it. (*Everybody's free – Baz Luhrmann*)
10. Het enige dat ik zeker weet is dat ik niets weet. (*Socrates*)
11. Geit neet, besteit neet.
