Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Cardiovascular disease risk in women with a history of preeclampsia

Nicolette M. Breetveld

1. Eén op de vier vrouwen heeft na een pre-eclampsische zwangerschap subklinisch hartfalen; in het begin betreft dit met name systole dysfunctie, maar vier jaar later is dit diastool verlies (dit proefschrift).
2. Vaatwanddysfunctie relateert niet aan stadium B hartfalen (dit proefschrift).
3. Het verhoogde risico op hart- en vaatziekten bij vrouwen na pre-eclampsie lijkt alleen op conto van vrouwen met resterende hypertensie te komen (dit proefschrift).
4. De helft van vrouwen die pre-eclampsie hebben doorgemaakt heeft een gering plasmavolume. Het is twijfelachtig of diuretica voor bloeddrukbehandeling bij deze groep aangewezen is (dit proefschrift).
5. Door inzicht te krijgen in cardiovasculaire risicofactoren, die een rol spelen in de etiologie van hartfalen, kunnen preventieprogramma's daar beter op ingericht worden (valorisatie).
6. De zwangerschap wordt de game-changer voor behoud en herstel van cardiovasculaire gezondheid bij vrouwen (valorisatie).
7. Help mij het zelf te doen (dr. Maria Montesorri).
8. There is no such thing as failure really, because failure is just that thing trying to move you in another direction. So you get as much from your losses as you do from your victories, because the losses are there to wake you up (Oprah Winfrey).
9. In tijden van corona wordt het planbaar maken van het leven op de proef gesteld.
10. Denkt aler gij doende zijt, en doende denkt dan nog (Guido Gezelle/Leendert Breetveld), maar niet tot in het oneindige.
