Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

On Social Cognition: Vulnerability and Symptoms in Psychosis

Dagmar Versmissen, 8 mei 2009

1. Sociale cognitie representeert een apart domein van kwetsbaarheid voor psychose, los van neurocognitie (dit proefschrift).
2. Sociale cognitie is een multidimensioneel construct wat maakt dat de term 'sociale cognitie' enkel mits toevoeging van een specificerende extensie gebruikt kan worden (dit proefschrift).
3. Sociale cognitie (source monitoring en mentalisatie) is niet enkel geassocieerd met het klinische psychotische fenotype, maar ook met de kwetsbaarheid voor psychose (dit proefschrift).
4. Emotie beïnvloedt cognitie (dit proefschrift).
5. Het bestuderen van sociaal cognitieve endofenotypes is noodzakelijk in de toekomst (dit proefschrift).
6. Sociale cognitie (source monitoring en mentalisatie) heeft, in tegenstelling tot neurocognitie, een sterk verklarend vermogen met betrekking tot het ontstaan van wanen en hallucinaties (dit proefschrift).
7. Misschien zal op een dag niemand meer weten wat waanzin geweest is (Michel Foucault).
8. Het is niet omdat je paranoïde bent, dat je niet achtervolgd wordt (Richard Nixon).
9. Niets is geheel waar, en zelfs dat niet (Frans Van Eeden).
10. The purpose of life, after all, is to live it, to taste experience to the utmost, to reach out eagerly and without fear for newer and richer experiences (Eleanor Roosevelt).
11. Never assume the obvious is true (fortune cookie).
