

Prenatal stress and the fetal gut

Citation for published version (APA):

Nikiforou, M. (2016). *Prenatal stress and the fetal gut: potential interventions to prevent adverse outcomes*. CPI - Wöhrmann Print Service. <https://doi.org/10.26481/dis.20161220mn>

Document status and date:

Published: 01/01/2016

DOI:

[10.26481/dis.20161220mn](https://doi.org/10.26481/dis.20161220mn)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Statements

Belonging to the dissertation entitled

Prenatal stress and the fetal gut:

Potential interventions to prevent adverse outcomes

Maria Nikiforou

Maastricht, 20th December 2016

- 1) Mucosal injury following chorioamnionitis requires direct intestinal IL-1 α exposure. (*this dissertation*)
- 2) Boosting intestinal regulatory T cells can protect the fetal gut against the negative consequences of chorioamnionitis. (*this dissertation*)
- 3) Intra-amniotic exposure to *Candida albicans* causes intestinal colonization, invasion within the fetal gut in conjunction with epithelial injury and intestinal inflammation. (*this dissertation*)
- 4) Global fetal hypoxia-ischemia results in intestinal inflammation, structural changes in gut muscle layers and distortion of the enteric nervous system. (*this dissertation*)
- 5) Intravenous administration of mesenchymal stem cells protects the fetal brain but not the fetal gut against global fetal hypoxia-ischemia. (*Jellema et al. 2013, this dissertation*)
- 6) Science is the acceptance of what works and the rejection of what does not. That needs more courage than we might think. (*Jacob Bronowski, 1908-1974*)
- 7) Insanity: doing the same thing over and over again and expecting different results. (*Albert Einstein, 1879-1955*)
- 8) We are what we repeatedly do. Excellence, then, is not an act, but a habit. (*Aristotle, 384-322 B.C.*)
- 9) Necessity is the mother of invention. (*Plato, 427-247, B.C.*)
- 10) Think slow, act fast.
