Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

PROPOSITIONS
accompanying the thesis

Haemodynamics in Deep Venous Obstruction

Advances towards a tailored treatment

Ralph L.M. Kurstjens
Maastricht, 14 December 2016

1. Air plethysmography in its current form is a technique unsuited for use in patients suffering from deep venous obstruction. - *This thesis*
2. When investigating a patient with lower limb complaints that are possibly of venous origin, one should always take down the patient's trousers and inspect the abdominal and pubic area. - *This thesis*
3. Post-thrombotic deep venous obstruction causes ambulatory venous hypertension, which can be mitigated by stenting of the obstructed tract, resulting in an improved quality of life. - *This thesis*
4. Before treating iliac vein obstruction with stenting, one should properly investigate the post-thrombotic state of the femoral and deep femoral vein. - *This thesis*
5. To enable a tailored treatment approach it is essential to develop non-invasive techniques that can adequately quantify flow, pressure changes and collateralisation. - *This thesis*
6. Unwavering conviction without the capability of debate is dangerous, whether in medicine, science, politics or religion.
7. Patients should be treated by a skilled physician, not an untrained health care insurer.
8. It is important to treat a patient and their complaints, not just abnormalities that appear on diagnostic imaging.
9. Patience is just procrastination without the anxiety. - *Spooks*
10. No pidas de grado lo que puedes tomar por fuerza. - *Miguel de Cervantes Saavedra*
Which may be loosely translated into: "Never stand begging for that which you have the power to earn."
11. We do not inherit the earth from our ancestors; we borrow it from our children.
- *Unknown*
