

Exploratory pathway analysis

Citation for published version (APA):

Kelder, T. A. J. (2011). *Exploratory pathway analysis*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20110708tk>

Document status and date:

Published: 01/01/2011

DOI:

[10.26481/dis.20110708tk](https://doi.org/10.26481/dis.20110708tk)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Propositions accompanying the thesis

Exploratory Pathway Analysis

by Thomas Kelder

1. A critical step of data analysis is to integrate what we already know.
– *Chapter 1*
2. Biological pathways provide a powerful medium for integrating existing knowledge in bioinformatics approaches to exploratory data analysis.
– *Chapter 2*
3. To improve understanding of complex diseases, we need to look beyond boundaries of canonical pathways.
– *Chapters 2 and 5*
4. The success of a wiki depends on the usability of its content.
– *Chapters 3 and 6*
5. The main challenge in writing user friendly software is to deal with the fact that users are not software friendly.
6. It would benefit scientific progress if after the semantic web, the next hot topic in bioinformatics would be biology.
7. An approximate answer to the right question is worth a great deal more than a precise answer to the wrong question.
– *John W. Tukey*
8. Commuting by bike in Florence has the reverse effect on life expectancy as in San Francisco.
9. Stellingen hebben weinig waarde voor een niet stellig persoon.
