Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

TRENDS IN DIAGNOSTIC CONFIRMATION AND TREATMENT OF PRE-MALIGNANT ABNORMALITIES AT SCREENING MAMMOGRAPHY

1. Screening reduceert de incidentie van hooggradige invasieve carcinomen door middel van vroege diagnostiek en behandeling van hooggradige DCIS (*dit proefschrift*).
2. De toename van secundaire excisiebiopten, als gevolg van de verbetering van diagnostische technieken, is geen gunstige ontwikkeling (*dit proefschrift*).
3. De motto's 'niet geschoten is altijd mis' en 'when in doubt take it out' gelden niet voor premaligne borstafwijkingen (*dit proefschrift*).
4. Een verwijzing vanwege microcalcificaties op het mammogram blijkt achteraf vaak 'vals alarm' (*dit proefschrift*).
5. Bij het uitvoeren van een lumpectomie in het kader van niet palpabele laesies, is het gebruik van signaal geleide chirurgie, bijvoorbeeld het jodiumzaadje, te prefereren boven draadgeleide chirurgie (*dit proefschrift*).
6. Als de angst regeert wordt er te veel geopereerd (*E.J.T. Luiten*).
7. Een voorstadium van borstkanker kan ook het eindstadium zijn.
8. Honorary authorship dient zo veel mogelijk te worden vermeden (*J.D. Luiten, World J Surg, 2018*).
9. Applaus kost geen geld.
10. Never let a good crisis go to waste (sir *Winston Churchill*).

Maastricht, 18 december 2020
