

# Intersectoral costs and benefits of health interventions

Citation for published version (APA):

Drost, R. M. W. A. (2016). *Intersectoral costs and benefits of health interventions: A change of perspective in economic evaluation*. [Doctoral Thesis, Maastricht University]. Maastricht University. <https://doi.org/10.26481/dis.20161020rd>

## Document status and date:

Published: 01/01/2016

## DOI:

[10.26481/dis.20161020rd](https://doi.org/10.26481/dis.20161020rd)

## Document Version:

Publisher's PDF, also known as Version of record

## Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

### **Intersectoral costs and benefits of health interventions**

A change of perspective in economic evaluation

door

**Ruben Drost**

1. Er is te weinig oog voor intersectorale kosten en baten (*dit proefschrift*).
2. Het is een misvatting dat intersectorale kosten en baten alleen van belang zijn voor preventieve interventies (*dit proefschrift*).
3. A societal perspective is a societal perspective--or is it? (*dit proefschrift, naar analogie van Milton Weinstein, J Health Econ. 1988 Sep;7(3):289-90*)
4. Input van experts accelereert en verbetert de kwaliteit van onderzoek (*dit proefschrift*).
5. Zolang men gezondheid als doel en niet als middel beschouwt, blijft de interesse van andere sectoren dan de gezondheidszorg in gezondheid te laag.
6. De uitdaging van onderzoekers is om ook methodologisch mee te bewegen met nieuwe maatschappelijke vraagstukken.
7. 2016 was het jaar van de richtlijnen in de gezondheidseconomie. Dit is goed voor de standaardisatie van economische evaluaties in de gezondheidszorg, alleen jammer dat de richtlijnen niet op elkaar zijn afgestemd.
8. Be first, be smarter, or cheat. I don't cheat. And although there are some pretty smart people around here, it sure is a hell of a lot easier to just be first (*Jeremy Irons, Margin Call*).
9. We travel not to escape life, but for life not to escape us.
10. Animum debes mutare, non caelum.
