Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Behorend bij het proefschrift

Implications in the treatment of peripheral arterial disease

Focussing on endovascular and non-invasive strategies

1. Duplex geleide PTA is effectiever in het reduceren van de peak systolic velocity dan conventionele PTA in de behandeling van iliacale TASC-II A/B-laesies. (Dit proefschrift)
2. De mate van afname in peak systolic velocity na PTA van een iliacale TASC-II A/B-laesie correleert niet met verbetering in enkel-arm-index. (dit proefschrift)
3. Vergroten van kennis over perifeer arterieel vaatlijden bij patiënten met claudicatio intermittens leidt tot grotere loopafstand na gesuperviseerde looptraining. (dit proefschrift)
4. Bepalen van het serum creatinine is een inadequate manier voor het detecteren van PC-AKI (post-contrast acute nierschade), en leidt tot het missen van de diagnose bij patiënten na een endovasculaire interventie voor perifeer arterieel vaatlijden Rutherford categorie 4-6. (dit proefschrift)
5. Endovasculaire interventies voor perifeer arterieel vaatlijden (Rutherford categorie 1-6) versnellen de afname in nierfunctie op lange termijn. (dit proefschrift, impactparagraaf)
6. Gedeelde verantwoordelijkheid en zorg voor de patiënt zijn essentieel in de samenwerking tussen medisch specialist en huisarts.
7. Richtlijnen zijn maar richtlijnen. Context van de individuele patiënt en shared decision making zijn minstens zo relevant.
8. The art of medicine consists of amusing the patient while nature cures the disease. (*Voltaire*)
9. "If a problem is fixable, if a situation is such that you can do something about it, then there is no need to worry. If it's not fixable, then there is no help in worrying. There is no benefit in worrying whatsoever." (*Dalai Lama XIV*)
10. You can't always get what you want, but if you try sometime you'll find, you get what you need. (*Mick Jagger, The Rolling Stones*)
