

Cardiac adaptation during and after hypertensive gestation

Citation for published version (APA):

Ghossein-Doha, C. (2015). *Cardiac adaptation during and after hypertensive gestation*. [Doctoral Thesis, Maastricht University]. Datawyse / Universitaire Pers Maastricht. <https://doi.org/10.26481/dis.20150417cg>

Document status and date:

Published: 01/01/2015

DOI:

[10.26481/dis.20150417cg](https://doi.org/10.26481/dis.20150417cg)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Stellingen behorende bij het proefschrift

Cardiac Adaptation During and after Hypertensive Gestation

Door Chahinda Ghossein-Doha

1. Gezien de relatie tussen prehypertensie en asymptomatisch hartfalen, zou in het licht van het verhoogd risico op hart- en vaatziekten van vrouwen na zwangerschapsvergiftiging, het behandelen van deze randverhoogde bloeddruk gerechtvaardigd zijn. (dit proefschrift)
2. Een te groot hart lijkt een pathofysiologische aanpassing te zijn van de verandering in hemodynamiek bij preeclampsie, terwijl een te klein hart een normale aanpassing van de hemodynamiek niet lijkt aan te kunnen. (dit proefschrift)
3. Preeclampsie is een onafhankelijke risicofactor voor asymptomatisch hartfalen. (dit proefschrift)
4. Gezien de bevinding dat een deel van de vrouwen na preeclampsie een kleiner hart heeft, lijkt concentrische remodelering een geschiktere maat te zijn dan linker ventrikel hypertrofie in het definiëren van structurele hartafwijkingen na preeclampsie. (dit proefschrift)
5. Emancipatie in gezondheid en ziekte betekent niet dat mannen en vrouwen gelijk zijn, maar wel dat zij gelijkwaardig benaderd en behandeld dienen te worden.
6. The weakness of a strong woman lays in her strength which makes that she has to handle most difficulties on her own, without the relief of relying on others at times of exhaustion
7. In our society, a strong man who fights for what he thinks is right is a boss and a strong woman who fights for what she thinks is right is a troublemaker
8. The teacher, who is indeed wise, does not bid you to enter the house of his wisdom but rather leads you to the threshold of your own mind. (Gibran Khalil)
9. Life is too short to learn all the knowledge that you find attractive, so learn only what inspires you. (Imam Ali Ibn Abi Talib)
10. Whenever you find yourself on the side of the majority, it is time to pause and reflect. (Mark Twain)
11. The relation between scientists and statistics resembles the relation between politicians and religion.

Maastricht, april 2015
